Why ASUS All-in-One PC?

Vision, Sound, Touch

Sensory Indulgences, All in One.

1 Pure Audio Enjoyment

ASUS-exclusive SonicMaster is empowered by ASUS R&D lab. By combining the best codec, powerful amplifiers and speakers, and a refined chamber design with fine-tuned audio signal, ASUS All-in-One PCs deliver unmatched PC Audio.

2 Flexible Aesthetics and Functionality

ASUS All-in-One PCs packs all the benefits of a PC in a package less than one inch thick. Streamlined components and wire management eliminate the clutter comes with traditional desktops. The VESA mount that comes standard allows easy wall mounting and versatile placement.

3 Stunning Visuals

From HD to 3D, ASUS All-in-One PCs do great justice to even the most demanding multimedia content. Featuring the latest CPUs, powerful graphics such as NVIDIA 3D Vision™ technology and Blu-ray Disc, they deliver truly impressive full HD cinematic visuals with ease.

4 Easy to Use

ASUS All-in-One PCs change the way you work and play thanks to a host of technologies:

- Accurate optical multi-touch controls let you pinch-zoom and rotate images, accelerating easy web page scrolling
- ASUS Super Hybrid Engine* technology boosts CPU performance at the touch of a button during demanding tasks
- Innovative F9 recovery allows users to restore their PC to a saved state with one touch

*Available on models with select Intel processors

ET2700XVTS

Ultimate Audio and Visual Sensation

NEW!

- Light, neat and slim design
- 27" frameless MVA panel and 178° wide view angle for brilliant view
- 10-point multi-touch for ultra-responsive fast and fun

Why ASUS Consumer Desktops?

CG Series

Built to Outperform

No. 1 Motherboard

No.1 Motherboard

Equipped with the best-selling and most award-winning ASUS motherboard for superior quality.

40% Energy Saving

Energy Saving

Equipped with the world's first real-time PC power saving chip – EPU which adjust CPU energy use in real time according to CPU load.

2x the Life Span

Ultra Durability

ASUS Desktops use 100% high-quality conductive polymer capacitors, the capacitors can be used for 57 years at 65°C.

10x Faster Transfer Speed

10 X Faster transfer

Conveniently located USB 3.0 ports for device swap and 10 times faster data transfer.

28dB Silent Operation

Quiet Operation

The ASUS-exclusive Q-Fan technology adjusts CPU fan speed according to its interior temperature. The noise level is as low as 28dB at standby mode.

10,000 Hours Longer Lifespan

ASUS VGA inside

ASUS-exclusive dust-proof fan design seamlessly sealed the vital parts of graphic card to ensure maximum efficiency and minimum tear-and-wear.

Why ASUS Commercial Desktops?

BM6360

Advanced Data-Asset Management

Hassle-free Expandability

Modular design lets your business expand easily as needed, adding hard drives, memory, PCI cards, and USB devices. The easy-to-service chassis design helps maximize uptime, making upgrades and routine maintenance effortless

EPU-Up to 40% Energy Saving

The exclusive ASUS EPU chip is the world's first PC energy saving controller, optimizing efficiency by detecting real time CPU loads and saving up to 40% on overall power consumption.

Stringent Quality Tests

All commercial models are tested to operate in the 0-50°C range and in even the most humid environments safely for over 70 consecutive hours. To simulate shipping, Pro Series products are dropped from different angles to ensure unwavering solid quality.

F9 One Key Restore

Displays an image file with manufacturer's system parameters, including operating system and default settings. Easy-setup resets to default with no recovery CD.

100% Solid State Capacitors for Ultra Reliability

ASUS Pro desktops are made with the world's best motherboards and solid state capacitors. High-quality components provide utmost durability, improved longevity and enhanced thermal performance.

Why ASUS EeeBox PC?

Smart Computer that Fits Anywhere

Whatever your needs, the EeeBox PCs can meet them with its smart processing power, compact-size, and rich connectivity.

1 Smart Performance Consumes 70% Less Power than a Desktop

Thanks to the exclusive Super Hybrid Engine* technology and low power processor, ASUS EeeBox PC is capable of consume 70% less energy than traditional PCs. It can boost system performance when handling demanding tasks and lower system power consumption when less processing power is required. (*only for units installed with Windows OS)

Up to 70% Power Savings in energy consumption

Compared with tower PC's

CPU Full Loading: 27W
Green EeeBox PC series

CPU Full Loading: 100W
Generic Desktop PC

ASUS Super Hybrid Engine
- Enhance System Performance by 10%
- Save up to 40% energy
- Easy switch between your modes based on task at hand

Super Performance Mode **Power Saving Mode** **High Performance Mode**

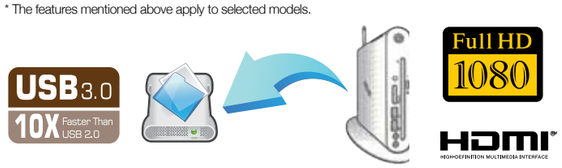
2 Compact Size That Can Fit in Any Workplace

With less than 1 liter in size, the cleverly designed mounting mechanism of EeeBox PC allows each units to be easily mounted on the back of a monitor to further reduce space occupied by the system.

3 Rich I/O That Seamlessly Connects All Your Peripherals

Whether it's instant file loading, Full HD playback, dual display support, or just browse the internet. ASUS Eee Box PC can satisfy your need with its rich connectivity.
- USB 3.0 can deliver file loading speed up to 10 times faster than USB 2.0
- Proficient graphic, HDMI ports, and D-sub output ports, you can connect to your HDTV or work on two separate displays for endless possibilities
- 4-in-1 memory card reader allows you to easily load file from your gadgets
- Built-in WIFI antenna enables highly flexible placement of your EeeBox

* The features mentioned above apply to selected models.



EB1020
Eco-friendly, Easy-managing, Space-saving

- AMD APU Dual-Core C50 Processor with excellent graphics performance
- Multiple I/O ports for increased connectivity including 6 USB2.0 ports for high compatibility and COM Port for flexible commercial application
- Uses 70% less power than a typical desktop

> CPU: Support AMD APU C50 Dual Core Processor @1.0GHz
> OS: Genuine Windows® 7 Ultimate or other editions available
> Chipset: AMD Hudson A50M
> Memory: DDR3 1GB SO-DIMM, up to 4GB
> VGA: AMD Radeon HD6250
> HDD: SATA 5400rpm 2.5" 250GB + ASUS WebStorage Trial

Why ASUS LCD Monitors?

1 A+ Panel and 3-Year Warranty* with ASUS' Promise of Premium Service and Quality

3-Year Warranty

A+ Panel

Get the very best of what ASUS has to offer with each and every product. All ASUS monitors come with an A+ panel and a 3-year warranty, and are subjected to stringent durability tests. This is just one of the reasons why ASUS is ranked #1 in quality and service by the Wall Street Journal Asia.

*Terms and conditions may vary by model.

2 Enhanced Images with Splendid™ Video Intelligence Technology

Splendid™ Video Intelligence Technology optimizes image quality to deliver the best visuals. Color and image fidelity are optimized through:

- Color correction — automatic enhancement of colors to provide clear and vivid images.
- Brightness and contrast correction — luminance enhancement helps bring out details in dark scenes.
- Sharpness correction — increases apparent detail to give visibly sharper images.
- Six preset video modes **(Standard, Game, Scenery, Night View, Theater and sRGB)*** — experience the most lifelike images no matter what you're watching.
